Using Content Beamer J2ME

To run Content Beamer J2ME, go to the MY STUFF directory from the main menu of your mobile phone. You will see the APPLICATIONS directory, where you can now select ThinPrint's mobile print solution, Content Beamer.

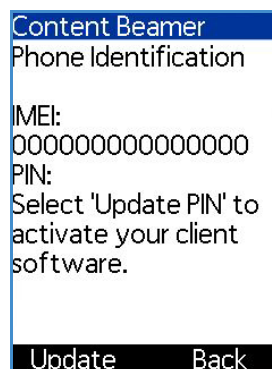

Registration The first time the print option is used, registration begins. The IMEI¹ of your mobile phone is sent to the Content Beamer server and saved there. Once registration has been successfully completed, you can test Content Beamer J2ME for one month for free².

The first time you run Content Beamer, you will see a welcome window with introductory information (Illus. 1).

Illus. 1 Welcome window at first use

Activation If you would like to use Content Beamer unlimitedly, you first need to register online at www.content-beamer.com/online-services. Once you have registered and selected the services and/or desired period of use, you can activate Content Beamer in the Content Beamer menu under IDENTIFICATION→ OPTIONS→ UPDATE PIN (Illus. 2).

Illus. 2 Content Beamer activation

Printing With Content Beamer J2ME, you can print any file stored on your mobile phone.

Once Content Beamer has been started, you will be shown various file directories. Select the desired document or image. Click it, and you will be asked whether you would like to print it, and are shown the file size (Illus. 3).

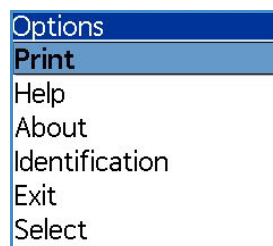

- 1 The IMEI, the International Mobile Equipment Identity, is a unique number assigned to every single mobile telephone for international identification.
- 2 Additional costs accrue only in that using Content Beamer establishes a connection to the server.

Illus. 3 Print confirmation

If you click yes, you will be shown a list of available printer types. Select the printer type you need. You can then print your file in original format via bluetooth to a nearby printer.

As an alternative, it is also possible to print a file by selecting OPTIONS → PRINT (Illus. 4) and then proceeding as above.

Illus. 4 Selecting the print option

Additional functions

Other functions can be started from the options menu. Select HELP for additional information; ABOUT shows the Content Beamer version number; under IDENTIFICATION, you can see your mobile phone's IMEI and PIN. With SELECT, depending on where you are at the time, you can change to a folder or print a selected document.
